

MSCI Mexico Select Risk Weighted Index (MXN)

The **MSCI Mexico Select Risk Weighted Index** is based on a traditional market cap weighted parent index, the MSCI Mexico Index, which includes Mexican large and mid cap stocks excluding REITs. Constructed using a simple, but effective and transparent process, the MSCI Mexico Select Risk Weighted Index reweights each security of the parent index (excluding REITs) so that stocks with lower risk are given higher index weights. The index seeks to emphasize stocks with lower historical return variance and tends to have a bias towards lower size and lower risk stocks.
