

# MSCI USA Quality GARP Select Index (USD)

The MSCI USA Quality GARP Select Index is designed to represent the performance of a strategy that seeks higher exposure to a growth factor. The Index selects securities from the MSCI USA Index (herein, 'the Parent Index') with higher Growth score, while covering 50% of weight in the Parent Index. The selected securities are weighted by the product of their market capitalization weight in the Parent Index and the Tilt Score. The Tilt Score is derived from free float-adjusted market capitalization, Quality score and Value score. Additionally, the capping is applied on constituent weights and sector weights to mitigate the concentration in the Index.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
