

# MSCI USA Choice ESG Screened Index (CAD)

The MSCI USA Choice ESG Screened Index is based on the MSCI USA Index, its parent index, and includes large- and mid-cap securities of the U.S. equity markets. The index is a free float-adjusted market capitalization weighted index that is designed to reflect the performance of companies that have better Environmental, Social and Governance (ESG) ratings relative to their sector peers, and to exclude companies that are involved in controversies and controversial business activities. The Index is designed for investors seeking a benchmark comprised of companies with above-average ESG profiles while avoiding companies incompatible with their values. Constituent selection is based on research provided by MSCI ESG Research.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

## CUMULATIVE INDEX PERFORMANCE – NET RETURNS (CAD) (MAY 2012 – MAR 2025)

- Utilities 0.15%

The MSCI USA Choice ESG Screened Index was launched on Dec 16, 2019. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

## ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.
