

MSCI USA Risk Weighted Top 150 Index (CAD)

The **MSCI USA Risk Weighted Top 150 Index** is based on a traditional market capitalization weighted parent index, the MSCI USA Index, which includes US large- and mid-capitalization stocks. Constructed using a simple, but effective and transparent process, each security of the parent index is reweighted so that stocks with lower risk are given higher index weights. The final constituents of the MSCI USA Risk Weighted Top 150 Index are determined by ranking these security level risk weights and taking the top 150 subset securities. The Index seeks to emphasize stocks with lower historical return variance and tends to have a bias towards lower size and lower risk stocks. Historically, the Index has exhibited lower realized volatility in comparison to its parent index, while maintaining reasonable liquidity and capacity.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

CUMULATIVE INDEX PERFORMANCE – NET RETURNS (CAD) (JAN 2011 – JAN 2026)

ANNUAL PERFORMANCE (%)

| Year | MSCI USA Risk Weighted Top 150 | MSCI USA |
