# MSCI USA Quality 100% Hedged to CAD Index (CAD)

The MSCI USA Quality 100% Hedged to CAD Index represents a close estimation of the performance that can be achieved by hedging the currency exposure of its parent index, the MSCI USA Index, to the CAD, the "home" currency for the hedged index. The index is 100% hedged to the CAD by selling the USD forward at the one-month Forward rate. The index aims to capture the performance of quality stocks selected from the parent index, by identifying stocks with high quality scores based on three main fundamental variables: high return on equity (ROE), stable year-over-year earnings growth and low financial leverage. The index reweights the selected quality growth stocks to emphasize stocks with high quality scores.
