

MSCI Expands Syndicated Loan Risk Analytics Using IHS Markit Pricing And Reference Data

New York – November 1, 2016 – [MSCI](#) Inc. (NYSE: MSCI) today announced it is enhancing its existing syndicated loan risk analytics offering by integrating IHS Markit’s industry-leading bank loan pricing, index and reference data. The expanded offering will provide asset managers and investors who hold syndicated loans in a multi-asset class portfolio with an integrated view of risk by incorporating loan-specific risk factors into MSCI’s suite of multi-asset class risk and performance analytics tools.

“We are pleased to add IHS Markit industry-leading loan data as we develop our new syndicated loan risk model.” said Peter Zangari, Global Head of MSCI Analytics “This new capability aims to address clients’ demands for integrating syndicated loan risk analytics into our multi-asset class risk and performance analytics offering.”

IHS Markit is an industry leader in bank loan data covering the \$1 trillion loan market. MSCI’s syndicated loan risk analytics will integrate IHS Markit’s current corporate actions, terms and conditions, pricing data, loan indexes and unique loan identifiers, LoanX IDs. The analytics will be delivered through MSCI’s risk management applications and, over time, IHS Markit’s Wall Street Office offering.

Kiet Tran, Managing Director and head of fixed income pricing at IHS Markit said, “Our industry-leading loan data are premium fuel for the risk engine designed by MSCI. Combining IHS Markit’s domain expertise in loans with MSCI’s expertise in analytics gives investors the advanced toolset they need to gain a holistic view of risk in the loan market, respond to changing market conditions and comply with risk-focused regulation.”

Representatives from both firms will be available to discuss the combined data and analytics at the 21st LSTA Annual Conference in New York City beginning November 3rd.

MSCI is a [top 5 risk management technology firm](#) according to the [2015 RiskTech100](#)[®], a study of risk and compliance technology companies by Chartis and was awarded Best Sell-Side Market Risk Product for [RiskManager](#), its scalable multi-asset class risk management platform, in the 2016 Waters Technology Sell-Side Technology Awards.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investable assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research Inc. and Barra LLC, may be used in calculating certain MSCI equity indexes. More information can be found in the relevant standard equity index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in investment products linked to MSCI equity indexes. Information can be found in MSCI's company filings on the Investor Relations section of www.msci.com
