

MSCI EAFE Extended ESG Focus Index (CAD)

The MSCI EAFE Extended ESG Focus Index is based on MSCI EAFE Index, its parent index, which includes securities across Developed Markets (DM) countries* around the world, excluding the US and Canada. The Index is designed to maximize exposure to positive environmental, social and governance (ESG) factors while exhibiting risk and return characteristics similar to those of the MSCI EAFE Index. The index is constructed by selecting constituents from MSCI EAFE Index through an optimization process that aims to maximize exposure to ESG factors for a target tracking error budget set to 50bps under certain constraints. The index is sector-diversified and targets companies with high ESG ratings in each sector. Tobacco, Controversial Weapons companies, Producers of or ties with Civilian Firearms, Thermal Coal and Oil Sands are not eligible for inclusion.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

The MSCI EAFE Extended ESG Focus Index was launched on Mar 27, 2018. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

ABOUT MSCI

MSCI (NYSE: MSCI Inc.) strengthens global markets by connecting participants across the financial ecosystem with a common language. Our research-based data, analytics and indexes, supported by advanced technology, set standards for global investors and help our clients understand risks and opportunities so they can make better decisions and unlock innovation.
