

MSCI Europe Quality 100% Hedged to CAD Index (CAD)

The MSCI Europe Quality 100% Hedged to CAD Index is based on a traditional market capitalization-weighted parent index, the MSCI Europe Index, which includes large- and mid-capitalization stocks across 15 Developed Market (DM) countries*. The index aims to capture the performance of quality stocks selected from the parent index, by identifying stocks with high quality scores based on three main fundamental variables: high return on equity (ROE), stable year-over-year earnings growth and low financial leverage. The index reweights the selected quality growth stocks from the parent index to emphasize stocks with high quality scores. The index is 100% hedged to CAD by notionally selling each foreign currency forward at the one-month forward exchange rate at the end of each month. The components of the Index, as well as the countries included, may change over time.
