

MSCI Canada Enhanced Value Capped Index (CAD)

The MSCI Canada Enhanced Value Capped Index is based on its parent index, MSCI Canada Index, which includes large and mid-cap representation across the Canadian equity markets exhibiting overall value style characteristics, targeting the higher of 25 securities or 50% market cap coverage of the parent index. The index is designed to represent the performance of securities that exhibit higher value characteristics relative to their peers within the corresponding GICS® sector. The value investment style characteristics for index construction are defined using three variables: Price-to-Book Value, Price-to-Forward Earnings and Enterprise Value-to-Cash flow from Operations. The index applies a 10% security capping, applied at each semi-annual rebalance.
