

MSCI China A Inclusion 100% Hedged to USD Index (USD)

The MSCI China A Inclusion 100% Hedged to USD Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI China A Inclusion Index, to the USD, the "home" currency for the hedged index. The index is 100% hedged to the USD by selling the CNH forward at the one-month Forward rate. The MSCI China A Inclusion Index is designed to track the progressive partial inclusion of A shares in the MSCI Emerging Markets Index over time. The index is designed for global investors accessing the A shares market using the Stock Connect framework and is calculated using China A Stock Connect listings based on the offshore RMB exchange rate (CNH).

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

¹ Based on monthly net returns data

² Based on NY FED Overnight SOFR from Sep 1 2021 & on ICE LIBOR 1M prior that date

The MSCI China A Inclusion 100% Hedged to USD Index was launched on May 31, 2018. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.
