

MSCI Europe Risk Weighted Top 100 Index (CAD)

The **MSCI Europe Risk Weighted Top 100 Index** is based on a traditional market capitalization weighted parent index, the MSCI Europe Index, which includes developed Europe large and mid-capitalization stocks. Constructed using a simple, but effective and transparent process, each security of the parent index is reweighted so that stocks with lower risk are given higher index weights. The final constituents of the MSCI Europe Risk Weighted Top 100 Index are determined by ranking these security level risk weights and taking the top 100 subset securities. The Index seeks to emphasize stocks with lower historical return variance and tends to have a bias towards lower size and lower risk stocks. Historically, the Index has exhibited lower realized volatility in comparison to its parent index, while maintaining reasonable liquidity and capacity.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

CUMULATIVE INDEX PERFORMANCE – NET RETURNS (CAD) (MAY 2009 – MAY 2024)

ANNUAL PERFORMANCE (%)

Year	MSCI Europe RW Top 100	MSCI Europe
