## 1. Introduction

The MSCI World Innovation Technology 50 Select Index (the 'Index'<sup>1</sup>) aims to represent the performance of companies that are associated with the development of new products and services commonly associated with or described as "Innovation technology", while excluding those involved in certain controversial business activities or with relatively low Controversies and ESG Ratings scores.

The MSCI World Innovation Technology 50 Select 5% Risk Control Index (the 'Risk Control Index') aims to represent the performance of the MSCI World Innovation Technology 50 Select Index while targeting an annualized volatility of 5%.

---

<sup>1</sup> The Index is governed by a set of methodology and policy documents ("Methodology Set"), including the present index methodology document. Please refer to Appendix IV for more details

---

## 2. Constructing the Indexes

The Index uses company ratings and research provided by MSCI Solutions LLC ('MSCI Solutions')<sup>2</sup> for the Index construction.

The Index is constructed by selecting stocks from the MSCI ACWI Investable Market Index (IMI) (the 'Parent Index') based on rules explained in the following sections.

The Index selects companies which are assessed to have high exposure to business activities such as –

- 3D Printing
- Internet of Things
- Cloud Computing
- Fintech
- Digital Payments
- Healthcare Innovation
- Robotics
- Cybersecurity
- Clean Energy and Smart Grids

MSCI may seek input from outside market experts on the ongoing evolution of the themes underlying the Index. However, such input is advisory only in nature. MSCI alone decides whether to use such input at all or to what extent. Receipt of such input, like any other feedback on MSCI indexes, may or may not lead to a change to the Index methodology or its constituents.

### 2.1 Determining the Eligible Universe of the Index

The Eligible Universe of the Index is constructed by selecting all securities from the Parent Index that have a Relevance Score<sup>3</sup> of 25% or more. Further filtering is applied as below.

GICS®<sup>4</sup> sector and sub-industry filtering

Stocks mapped to the following GICS® sub-industries are excluded from the Selected Universe.

No	GICS® Sector	GICS® Sub-Industries
1	Energy	<ul style="list-style-type: none"> <li>• Integrated Oil &amp; Gas</li> </ul>
2	Industrials	<ul style="list-style-type: none"> <li>• Office Services &amp; supplies</li> </ul>
3	Consumer Staples	<ul style="list-style-type: none"> <li>• Packaged Foods &amp; Meats</li> </ul>
4	Utilities	<ul style="list-style-type: none"> <li>• Electric Utilities</li> </ul>

<sup>2</sup> See Section 4 for further information regarding sustainability and climate data used in the Indexes that MSCI Limited and MSCI Deutschland GmbH source from MSCI Solutions LLC (MSCI Solutions), a separate subsidiary of MSCI Inc. MSCI Solutions is solely responsible for the creation, determination and management of such data as a provider to MSCI Limited and MSCI Deutschland GmbH. MSCI Limited and MSCI Deutschland GmbH are the benchmark administrators for the MSCI indexes.

<sup>3</sup> For details of calculation of Relevance Scores, please refer to the MSCI Thematic Relevance Score Methodology document (available on <https://www.msci.com/index-methodology>)

<sup>4</sup> GICS, the global industry classification standard jointly developed by MSCI and S&P Dow Jones Indices.

No	GICS® Sector	GICS® Sub-Industries
		<ul style="list-style-type: none"> <li>• Multi-Utilities</li> <li>• Independent Power Producers &amp; Energy Traders</li> </ul>

## 2.1.1 Controversial business exclusion criteria

### Controversial business exclusion criteria

Securities of companies involved in following businesses are excluded from the Eligible Universe:

- Controversial Weapons
- Conventional Weapons
- Nuclear Weapons
- Civilian Firearms
- Tobacco
- Thermal Coal
- Oil Sands
- Unconventional Oil & Gas
- Arctic Oil & Gas
- UN Global Compact Violators

Please refer to Appendix I for more details on these criteria.

### Controversy Score

- Controversy Score = 0 ('Red Flag' companies) – All companies assessed as having involvement in controversies that are classified as Red Flags (MSCI Controversy Score of 0) are excluded from the Eligible Universe. A Red Flag indicates an ongoing, Very Severe controversy implicating a company directly through its actions, products, or operations.

## 2.1.2 Liquidity Screening Criteria

Securities that have a 3-month average daily trading value (3M ADTV) less than 3 million USD are excluded from the Eligible Universe. For the calculation of ADTV, please refer to Appendix II.

## 2.1.3 Size Screening Criteria

Securities that have a free-float market capitalization less than 200 million USD are excluded from the Eligible Universe.

## 2.1.4 Emerging Markets (EM) Country Filter

Emerging Markets (EM) securities from only the below select countries are eligible for inclusion in the final index:

- China
- Taiwan
- South Korea

- South Africa
- Brazil
- Thailand
- Malaysia
- Mexico

## 2.2 Filtered Universe

Filtered Universe is constructed by excluding securities from the Eligible Universe which are in the bottom quartile by ESG Industry Adjusted Score.

## 2.3 Security Selection

Securities in the Filtered Universe are ranked in descending order of their Relevance Score. If multiple securities have the same Relevance Score, then the security having a higher weight in the Parent Index is given a higher rank.

Securities in the top half of the ranked universe are eligible for inclusion in the final index. The final number of securities in the index is determined as:

N= Minimum (Maximum (Securities in the top half of the ranked universe, 60), 250)

The top 'N' securities from the ranked universe are selected for inclusion in the Index. If the number of securities in the universe is below 60, all the securities in the universe are selected for inclusion in the index.

## 2.4 Final Universe

At each rebalancing, all the securities eligible for inclusion after step 2.3 are reweighted in line with MSCI Adaptive Capped Indexes Methodology<sup>5</sup> , with fixed multiplier L set to 5. Further capping is applied as described below.

### 2.4.1 Emerging Markets (EM) Weight Capping

Aggregate weight of Emerging Markets (EM) securities in the final index is capped at aggregate weight of Emerging Markets (EM) in the Parent Index + 10% to limit the geographical exposure of the index to Emerging Markets.

### 2.4.2 Security Weight Capping

Additionally, index constituents' weights are capped at 15% at the security level to mitigate concentration risk.

---

<sup>5</sup> For details please refer to the MSCI Adaptive Capped Indexes Methodology (Available on <https://www.msci.com/indexmethodology>)

## 2.5 ESG Profile Check

The Final Universe calculated in Section 2.4 is assessed against the minimum requirements detailed in the below table.

In case the Final Universe is found deficient on any of the minimum requirements, then the weights of the securities in the final universe are determined through an iterative process as described in Appendix III. The iterative down weighting process also maintains capping at 15% security level to mitigate concentration risk.

Minimum Requirements	Values	Reference Index
Carbon Emission Intensity relative to the Reference Index	Target Carbon Emission Intensity lower than the Reference Index	MSCI ACWI IMI Disruptive Technology Index
Weighted Average Board Independence relative to the Reference Index	Target Weighted Average Board Independence higher than the Reference Index	MSCI ACWI IMI Disruptive Technology Index

## 2.6 Constructing the MSCI World Innovation Technology 50 Select Index

To the remaining Universe after the ESG Profile check, the following filters and selection steps are applied sequentially to determine the constituents of MSCI World Innovation Technology 50 Select Index:

### 2.6.1 World IMI Filter

Only securities that are part of the MSCI World IMI are retained.

### 2.6.2 Additional Liquidity Filter

Securities that have a 3-month average daily trading value (3M ADTV) of less than USD 10 million are excluded. For the calculation of ADTV, please refer to Appendix II.

To avoid multiple securities of the same issuer in the final Index, only the most liquid security for each issuer per its 3-month ADTV, is eligible for inclusion in the Index.

### 2.6.3 Top 50 Selection

From the remaining securities, the top 50 securities are selected based on their weights in the Parent Index.

### 2.6.4 Security Weighting

At each rebalancing, the Index is constructed by weighting the eligible constituents in proportion of their free float adjusted market capitalization.

Additionally, the constituent weights are capped to mitigate concentration risk in the Index. The individual security weights in the final Index are capped at 10%

## 2.7 Constructing the MSCI World Innovation Technology 50 Select 5% Risk Control Index

The “Risk Control Index” is constructed by applying the MSCI Risk Control Index Methodology<sup>6</sup> to the MSCI World Innovation Technology 50 Select Index with the following parameters:

	MSCI Risk Control Indexes Methodology Parameters	Parameters
1	Calendar Rule	Daily
2	Return Variant of the underlying index	Net Return
3	Risk Free Rate	ESTR (from 01- Sep 2021 onwards) EURIBOR-EUR (till 31-Aug-2021)
4	Risk Free Maturity Rate	Overnight
5	Rebalancing Type	Volatility
	Volatility Rebalancing Parameters	
6	Risk Control Level	5%
7	Underlying Index Level Currency	EUR
8	Maximum Leverage	100%
9	Buffer	5%
10	Volatility Calculation Type	Equal Weighted Volatility
	Estimator Parameters	
11	Lag between Rebalancing Date and Effective Date	3
12	Short Term number of days estimate	21
13	Long Term number of days estimate	63
	Additional Parameters	
14	Holiday Parameter – Index Holidays	EURONEXT PARIS, BORSE FRANKFURT, SWX SWISS EXCHANGE, NYSE  full day holidays
15	Return Period	1
16	Maximum Leverage change limit	50%
17	Index Fee (%)	0.5% (act/365)

## 2.8 Treatment of Unrated Companies

Companies not assessed by MSCI Solutions on data for any of the following MSCI Solutions products are not eligible for inclusion in the Indexes.

- MSCI ESG Ratings
- MSCI Controversies

---

<sup>6</sup> Please refer to the MSCI Risk Control Indexes Methodology at <http://www.msci.com/index-methodology> for details as well as intended use of such indexes.

- MSCI Climate Change Metrics
- MSCI Business Involvement Screening Research (BISR)

### 3. Maintaining the Indexes

#### 3.1 Monthly Review of Controversies

Index constituents are reviewed on a monthly basis for the involvement in controversies<sup>7</sup>. Existing constituents will be deleted if they face controversies as defined by MSCI Controversy Score of 0 ('Red flag' companies). A Red Flag indicates an ongoing, very severe controversy implicating a company directly through its actions, products, or operations. Existing Index constituents with missing MSCI Controversy Scores are not deleted during Monthly Review of Controversies.

MSCI uses MSCI Controversies data as of the end of the month preceding the review (e.g., end of June data for the July monthly review). For some securities, such data may not be published by MSCI Solutions by the end of the month preceding the review. For such securities, MSCI will use data published after the end of month, when available, for the monthly review of the Index.

The pro forma index is generally announced nine business days before the effective date.

#### 3.2 Semi-Annual Index Review

The Index is reviewed on a Semi-Annual basis in May and November to coincide with the May and November Index Reviews of the Parent Index, and the changes are implemented at the end of May and November. In general, the pro forma index is announced nine business days before the effective date.

During the Semi-Annual Index Review, the Eligible Universe, Filtered Universe and Final Universe are updated.

In general, MSCI uses Relevance Score data as of two business days prior to the rebalancing date of the Semi-Annual Index Review.

In general, MSCI uses MSCI Solutions data<sup>8</sup> (including MSCI ESG Ratings, MSCI Climate Change Metrics, MSCI Controversies Scores and MSCI Business Involvement Screening Research) as of the end of the month preceding the Index Reviews. For some securities, such data may not be published by MSCI Solutions by the end of the month preceding the Index Review. For such securities, MSCI will use data published after the end of month, when available. This approach aims to capture timely updates to Ratings of the constituents and coincides with the rebalancing of the relevant MSCI Parent Indexes.

##### 3.2.1 Security selection buffer rules applied in section 2.3

To reduce index turnover and enhance index stability, a buffer rule of 25% is applied during the on-going semi-annual index reviews. For example, if the 'index' targets 60 securities, buffers are

---

<sup>7</sup> The monthly review of controversies is applied within the Index effective October 2, 2023 and is not applicable historically prior to that date.

<sup>8</sup> See Section 4 for details of data sourced from MSCI Solutions used in Indexes.

applied between rank 46 and 75. The securities in the ranked universe (as detailed in section 2.3) with a relevance score rank at or above 45 will be added to the final index on a priority basis. The existing constituents that have a relevance score rank between 46 and 75 are then successively added until the number of securities in the final index reaches 60. If the number of securities is below 60 after this step, the remaining securities in the ranked universe with the highest relevance score rank are added until the number of securities in the final index reaches 60.

### 3.3 Ongoing Event-Related Maintenance

The general treatment of corporate events in the index aims to minimize turnover outside of Index Reviews. The methodology aims to appropriately represent an investor's participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved.

The following section briefly describes the treatment of common corporate events within the index.

No new securities will be added (except where noted below) to the index between Index Reviews. Parent Index deletions will be reflected simultaneously.

EVENT TYPE	EVENT DETAILS
New additions to the Parent Index	A new security added to the parent index (such as IPO and other early inclusions) will not be added to the index.
Spin-Offs	All securities created as a result of the spin-off of an existing Index constituent will not be added to the Index at the time of event implementation. Reevaluation for inclusion in the Index will occur at the subsequent Index Review.
Merger/Acquisition	For Mergers and Acquisitions, the acquirer's post event weight will account for the proportionate amount of shares involved in deal consideration, while cash proceeds will be invested across the Indexes.
	If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Indexes and the acquiring non-constituent will not be added to the Indexes.
Changes in Security Characteristics	A security will be excluded from the Index if there are changes in characteristics (country, sector, size segment, etc.) Reevaluation for inclusion in the Indexes will occur at the subsequent Index Review.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology.

The MSCI Corporate Events methodology book is available at: <https://www.msci.com/index-methodology>

## 4. MSCI Solutions LLC

The Index is a product of MSCI Inc. that utilizes information such as company ratings and research produced and provided by MSCI Solutions LLC (MSCI Solutions), a subsidiary of MSCI Inc. In particular, the Index uses the following MSCI Solutions products: MSCI ESG Ratings, MSCI Controversies, MSCI Business Involvement Screening Research, MSCI Climate Change Metrics, MSCI Impact Solutions, MSCI ESG Ratings, and MSCI ESG Governance Metrics. MSCI Indexes are administered by MSCI Limited and MSCI Deutschland GmbH.

### 4.1 MSCI ESG Ratings

MSCI ESG Ratings aim to measure entities' management of environmental, social and governance risks and opportunities. MSCI ESG Ratings use a weighted average key issue calculation that is normalized by industry to arrive at an industry-adjusted ESG score (0-10), which is then translated to a seven-point scale from 'AAA' to 'CCC', indicating how an entity manages relevant key issues relative to industry peers.

The MSCI ESG Ratings methodology can be found at: <https://www.msci.com/legal/disclosures/esg-disclosures>.

### 4.2 MSCI Controversies

MSCI Controversies provide assessments of controversies concerning the potential negative environmental, social, and/or governance impact of company operations, products and services. The evaluation framework used in MSCI Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.

The MSCI Controversies methodology can be found at:  
<https://www.msci.com/legal/disclosures/esg-disclosures>.

### 4.3 MSCI Business Involvement Screening Research

MSCI Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions reliably and efficiently.

The MSCI Business Involvement Screening Research methodology can be found at:  
<https://www.msci.com/legal/disclosures/esg-disclosures>.

### 4.4 MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support institutional investors seeking to integrate climate risk and opportunities into their investment strategy and processes.

This includes investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, alignment with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks. The dataset spans across the four dimensions of a climate strategy: transition risks, green opportunities, physical risks and 1.5° alignment.

#### 4.4.1 Fossil Fuels and Power Generation Metrics

MSCI Solutions identifies companies involved in fossil fuel-related assets and activities including fossil fuel reserves, resource extraction, power generation and generation capacity, revenue from such assets and activities and capital investments in such assets and activities. The metrics are based on disclosed activities, disclosed revenue and estimates of revenue that are extrapolated from company disclosures and eligible third-party sources (such as NGOs).

For more details on MSCI Climate Change Metrics, please refer to

<https://www.msci.com/legal/disclosures/climate-disclosures>

## Appendix I: Controversial Business Exclusion Criteria

Companies whose activities meet the following values and climate change-based criteria, as evaluated by MSCI Solutions, are excluded from the MSCI World Innovation Technology 50 Select Index.

### Values-based Exclusions Criteria:

- Controversial Weapons
  - All companies with any tie to Controversial Weapons (cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, non-detectable fragments and incendiary weapons), as defined by the methodology of the MSCI Ex-Controversial Weapons Indexes available at <https://www.msci.com/index-methodology>.
- Nuclear Weapons
  - All companies that manufacture nuclear warheads and/or whole nuclear missiles.
  - All companies that manufacture components that were developed or are significantly modified for exclusive use in nuclear weapons (warheads and missiles).
  - All companies that manufacture or assemble delivery platforms that were developed or significantly modified for the exclusive delivery of nuclear weapons.
  - All companies that provide auxiliary services related to nuclear weapons.
  - All companies that manufacture components that were not developed or not significantly modified for exclusive use in nuclear weapons (warheads and missiles).
  - All companies that manufacture or assemble delivery platforms that were not developed or not significantly modified for the exclusive delivery of nuclear weapons.
  - All companies that manufacture components for nuclear-exclusive delivery platforms.
- Civilian Firearms
  - All companies classified as "Producer" of firearms and small arms ammunitions for civilian markets. It does not include companies that cater to the military, government, and law enforcement markets.
  - All companies deriving 5% or more revenue from manufacture and retail of civilian firearms and ammunition.
- Tobacco
  - All companies classified as a "Producer"
  - All companies deriving 5% or more aggregate revenue from the production, distribution, retail and supply of tobacco-related products.
- Conventional Weapons
  - All companies deriving 10% or more revenue from the production of conventional weapons and components
  - All companies deriving 10% or more aggregate revenue from weapons systems, components, and support systems and services

Climate Change-based Exclusions Criteria:

- Thermal Coal
  - All companies deriving 5% or more revenue (either reported or estimated) from the mining of thermal coal (including lignite, bituminous, anthracite and steam coal) and its sale to external parties. It excludes: revenue from metallurgical coal; coal mined for internal power generation (e.g. in the case of vertically integrated power producers); intra-company sales of mined thermal coal; and revenue from coal trading.
  - All companies deriving 5% or more revenue (either reported or estimated) from the thermal coal based power generation.
  - All companies that are deriving 50% or more power<sup>9</sup> from thermal coal.
  - All companies that own thermal coal reserves.
- Unconventional Oil & Gas
  - All companies deriving 5% or more revenues from oil sands, oil shale (kerogen-rich deposits), shale gas, shale oil, coal-seam gas, coal-bed methane as well as Arctic onshore/offshore reserves.
- Arctic Oil & Gas
  - All companies deriving 5% or more revenue from Arctic Oil
  - All companies deriving 5% or more revenue from Arctic Gas
  - All companies with evidence of producing Arctic oil. This factor does not capture revenue from non-extraction activities (e.g., exploration, surveying, processing, refining); ownership of Arctic oil reserves with no associated extraction revenues; revenue from intra-company sales.
  - All companies with evidence of producing Arctic gas. This factor does not capture revenue from non-extraction activities (e.g., exploration, surveying, processing, refining); ownership of Arctic gas reserves with no associated extraction revenues; revenue from intracompany sales.
- Oil Sands
  - All companies deriving 5% or more revenue from oil sands extraction, which own oil sands reserves and disclose evidence of deriving revenue from oil sands extraction. Companies that derive revenue from non-extraction activities (e.g. exploration, surveying, processing, refining) or intra-company sales are not excluded. Additionally, companies that own oil sands reserves with no associated revenue are also not excluded.
- Global Norms – United Nations Global Compact Compliance
  - All companies that fail to comply with the United Nations Global Compact principles.

---

<sup>9</sup> As per [https://www.ipcc.ch/site/assets/uploads/2018/02/ipcc\\_wg3\\_ar5\\_chapter7.pdf](https://www.ipcc.ch/site/assets/uploads/2018/02/ipcc_wg3_ar5_chapter7.pdf), thermal coal based power generation has median lifecycle emissions exceeding 100gCO2/kWh

## Appendix II: Calculation of 3-Month Average Daily Traded Value (ADTV)

$$ADTV = \frac{ATV}{252}$$

Where:

- ADTV = 3-month Average Daily Traded Value
- ATV = 3-month Annualized Traded Value

For details on the calculation of ATV, please refer to the MSCI Fundamental Data Methodology (<https://www.msci.com/index-methodology>).

## Appendix III: ESG Profile Check

The ESG Profile Check is applied on the securities of the Final Universe with the objective of meeting all the minimum requirements detailed in the table in Section 2.5.

Starting with the Final Universe, an iterative down weighting process is applied in order to meet with the minimum requirements for the Indexes. The iterative down weighting stops when all the requirements defined in above are met. The steps followed in the iterative downweighting are outlined below:

Step 1. Check whether all targets for the Index are met. If all targets are met, then no downweighting is required.

Step 2. Identify stocks that are either in bottom quartile by Board Independence (%) (i.e. with lowest scores) or are in the top quartile by Carbon Emissions Intensity (i.e. with highest carbon intensity). These stocks form the "downweighting group". Rest of the stocks from the Final Universe form the "upweighting group".

Step 3. Select the worst stock in the "downweighting group" and reduce its weight in steps of 25% (free weight) and distribute the free weight among the stocks of the "upweighting group" in proportion of their weight at Step 2. A stock cannot be down weighted by more than 75% of its weight in Step 2. Stock weight in 'upweighting group' is capped at 15%.

Step 4. If the targets are still not met, then select the next worst stock and repeat Step 3.

Step 5. Relaxation Steps:

- a. If all stocks in the "downweighting group" have been down weighted by 75% and targets are still not met, then repeat Step 3 and 4 by down weighting worst stock by 90% of its weight from Step 2.
- b. If targets are not met at Step 5a, then repeat Step 3 and 4 by excluding the worst stock – down weighting the worst stock by 100%.

Worst Stocks:

- a. In Step 1, if targets are not met on Carbon Emissions Intensity, then the worst stock is the stock with largest Carbon Emissions Intensity.
- b. If in Step 1, the target on Carbon Emissions Intensity is met, and the target on Weighted Average Board Independence is not met, then the worst stock is the stock with lowest Board Independence (%).

## Appendix IV: Methodology Set

The Index is governed by a set of methodology and policy documents ("Methodology Set"), including the present index methodology document as mentioned below:

- Description of methodology set –  
<https://www.msci.com/index/methodology/latest/ReadMe>
- MSCI Corporate Events Methodology –  
<https://www.msci.com/index/methodology/latest/CE>
- MSCI Fundamental Data Methodology –  
<https://www.msci.com/index/methodology/latest/FundData>
- MSCI Index Calculation Methodology –

- MSCI Index Glossary of Terms –  
<https://www.msci.com/index/methodology/latest/IndexGlossary>
- MSCI Index Policies –  
<https://www.msci.com/index/methodology/latest/IndexPolicy>
- MSCI Global Industry Classification Standard (GICS) Methodology –  
<https://www.msci.com/index/methodology/latest/GICS>
- MSCI Global Investable Market Indexes Methodology –  
<https://www.msci.com/index/methodology/latest/GIMI>
- MSCI Global ex Controversial Weapons Indexes Methodology –  
<https://www.msci.com/index/methodology/latest/XCW>
- MSCI Global ex Tobacco Involvement Index –  
<https://www.msci.com/index/methodology/latest/ExTobacco>
- ESG Factors In Methodology\*

The Methodology Set for the Indexes can also be accessed from MSCI's webpage

<https://www.msci.com/index-methodology> in the section 'Search Methodology by Index Name or Index Code'.

\* 'ESG Factors in Methodology' contains the list of environmental, social, and governance factors considered, and how they are applied in the methodology (e.g., selection, weighting or exclusion). It can be accessed in the Methodology Set as described above.

## Appendix V: Changes to this Document

The following sections have been modified as of January 2026:

- In the section 2.6.2, the filter to select only the most liquid security per issuer is added.

## Notice and disclaimer

The data, data feeds, databases, reports, text, graphs, charts, images, videos, recordings, models, metrics, analytics, indexes, ratings, scores, cases, estimates, assessments, software, websites, products, services and other information and materials contained herein or delivered in connection with this notice (collectively, the "Information") are copyrighted, trade secrets (when not publicly available), trademarks and proprietary property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), MSCI's licensors, direct or indirect suppliers and authorized sources, and/or any third party contributing to the Information (collectively, with MSCI, the "Information Providers"). All rights in the Information are reserved by MSCI and its Information Providers and user(s) shall not, nor assist others to, challenge or assert any rights in the Information.

Unless you contact MSCI and receive its prior written permission, you must NOT use the Information, directly or indirectly, in whole or in part (i) for commercial purposes, (ii) in a manner that competes with MSCI or impacts its ability to commercialize the Information or its services, (iii) to provide a service to a third party, (iv) to permit a third party to directly or indirectly access, use or resell the Information, (v) to redistribute or resell the Information in any form, (vi) to include the Information in any materials for public dissemination such as fund factsheets, market presentations, prospectuses, and investor information documents (e.g. KIIDs or KIDs), (vii) to create or as a component of any financial products, whether listed or traded over the counter or on a private placement basis or otherwise, (viii) to create any indexes, ratings or other data products, including in derivative works combined with other indexes or data or as a policy, product or performance benchmarks for active, passive or other financial products, (ix) to populate a database, or (x) to train, use as an input to, or otherwise in connection with any artificial intelligence, machine learning, large language models or similar technologies except as licensed and expressly authorized under MSCI's AI Contracting Supplement at <https://www.msci.com/legal/supplemental-terms-for-client-use-of-artificial-intelligence>.

The intellectual property rights of MSCI and its Information Providers may not be misappropriated or used in a competitive manner through the use of third-party data or financial products linked to the Information, including by using an MSCI index-linked future or option in a competing third-party index to provide an exposure to the underlying MSCI index or by using an MSCI index-linked ETF to create a financial product that provides an exposure to the underlying MSCI index without obtaining a license from MSCI.

The user or recipient of the Information assumes the entire risk of any use it may make, permit or cause to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, SUITABILITY, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION. Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall MSCI or any other Information Provider have any liability arising out of or relating to any of the Information, including for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages, even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited.

The Information, including index construction, ratings, historical data, or analysis, is not a prediction or guarantee of future performance, and must not be relied upon as such. Past performance is not indicative of future results. The Information may contain back tested data. Back-tested performance based on back-tested data is not actual performance but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy. The Information may include "Signals," defined as quantitative attributes or the product of methods or formulas that describe or are derived from calculations using historical data. Signals are inherently backward-looking because of their use of historical data, and they are inherently inaccurate, not intended to predict the future and must not be relied upon as such. The relevance, correlations and accuracy of Signals frequently change materially over time.

The Information may include data relating to indicative prices, evaluated pricing or other information based on estimates or evaluations (collectively, "Evaluations") that are not current and do not reflect real-time traded prices. No evaluation method, including those used by the Information Providers, may consistently generate evaluations or estimates that correspond to actual "traded" prices of any relevant securities or other assets. Evaluations are subject to change at any time without notice and without any duty to update or inform you, may not reflect prices at which actual transactions or collateral calls may occur or have occurred. The market price of securities, financial instruments, and other assets can be determined only if and when executed in the market. There may be no, or may not have been any, secondary trading market for the relevant securities, financial instruments or other assets. Private capital, equity, credit and other assets and their prices may be assessed infrequently, may not be priced on a secondary market, and shall not be relied upon as an explicit or implicit valuation of a particular instrument. Any reliance on fair value estimates and non-market inputs introduces potential biases and subjectivity. Internal Rate of Return metrics are not fully representative without full disclosure of fund cash flows, assumptions, and time horizons.

The Information does not constitute, and must not be relied upon as, investment advice, credit ratings, or proxy advisory or voting services. None of the Information Providers, their products or services, are fiduciaries or make any recommendation, endorsement, or approval of any investment decision or asset allocation. Likewise, the Information does not represent an offer to sell, a solicitation to buy, or an endorsement of any security, financial product, instrument, investment vehicle, or trading strategy, whether or not linked to or in any way based on any MSCI index, rating, subcomponent, or other Information (collectively, "Linked Investments"). The Information should not be relied on and is not a substitute for the skill, judgment and experience of any user when making investment and other business decisions. MSCI is not responsible for any user's compliance with applicable laws and regulations. All Information is impersonal, not tailored to the needs of any person, entity or group of persons, not objectively verifiable in every respect, and may not be based on information that is important to any user.

It is not possible to invest in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI makes no assurance that any Linked Investments will accurately track index performance or provide positive investment returns. Index returns do not represent results of actual trading of investible assets/securities. MSCI maintains and calculates indexes but does not manage assets. The calculation of indexes and index returns may deviate from the stated methodology. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase securities underlying the index or Linked Investments. The imposition of these fees and charges would cause the performance of a Linked Investment to be different than the MSCI index performance.

Information provided by MSCI Solutions LLC and certain related entities ("MSCI Solutions"), including materials utilized in MSCI sustainability and climate products, have not been submitted to, nor received approval from any regulatory body. MSCI sustainability and climate offerings, research and data are produced by, and ratings are solely the opinion of MSCI Solutions. Other MSCI products and services may utilize information from MSCI Solutions, Barra LLC or other affiliates. More information can be found in the relevant methodologies on [www.msci.com](https://www.msci.com). MSCI Indexes are administered by MSCI Limited (UK) and MSCI Deutschland GmbH. No regulated use of any MSCI private real assets indexes in any jurisdiction is permitted without MSCI's express written authorization. The process for applying for MSCI's express written authorization can be found at: <https://www.msci.com/index-regulation>.

MSCI receives compensation in connection with licensing its indexes and other information to third parties. MSCI Inc.'s revenue includes fees based on assets in Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of [msci.com](http://msci.com). Issuers mentioned in MSCI Solutions materials or their affiliates may purchase research or other products or services from one or more MSCI affiliates, manage financial products such as mutual funds or ETFs rated by MSCI Solutions or its affiliates or are based on MSCI Indexes. Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Constituents in MSCI Inc. equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. MSCI Solutions has taken steps to mitigate potential conflicts of interest and safeguard the integrity and independence of its research and ratings.

MIFID2/MIFIR notice: MSCI Solutions does not distribute or act as an intermediary for financial instruments or structured deposits, nor does it deal on its own account, provide execution services for others or manage client accounts. No MSCI product or service supports, promotes or is intended to support or promote any such activity. MSCI Solutions is an independent provider of sustainability and climate data. All use of indicative prices for carbon credits must comply with any rules specified by MSCI. All transactions in carbon credits must be traded "over-the-counter" (i.e. not on a regulated market, trading venue or platform that performs a similar function to a trading venue) and result in physical delivery of the carbon credits.

You may not remove, alter, or obscure any attribution to MSCI or notices or disclaimers that apply to the Information. MSCI, Barra, RiskMetrics, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and S&P Dow Jones Indices. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and S&P Dow Jones Indices. Terms such as including, includes, for example, such as and similar terms used herein are without limitation.

MSCI and its Information Providers may use automated technologies and artificial intelligence to help generate content and output incorporated in the Information.

Privacy notice: For information about how MSCI collects and uses personal data, please refer to our Privacy Notice at: <https://www.msci.com/privacy-pledge>. For copyright infringement claims contact us at [dmca@msci.com](mailto:dmca@msci.com). This notice is governed by the laws of the State of New York without regard to conflict of laws principles.
