

UK FCA Climate– Related Disclosure Requirements: An Overview for Investors

What it is and who does it apply to?

In December 2021, the UK Financial Conduct Authority (FCA) released its final rules and guidance outlining mandatory climate disclosure requirements for asset managers, life insurers and FCA-regulated pension providers.¹ The FCA's framework is consistent with the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

What are the requirements?

The regime requires in-scope firms to make disclosures on an annual basis:

- Entity-level – a TCFD report published on a prominent place on the firm’s website on how the firm takes into account climate-related risk and opportunities in managing or administering investments on behalf of clients. This includes disclosing any targets (including KPIs to measure against their progress) as well as approach to climate-related scenario analysis.
- Product-level – disclosures (including a core set of climate-related metrics) on the firm’s products and portfolios made publicly at a prominent place on the main website of the firm and included or cross-referenced in an appropriate client communication or made on request to certain eligible institutional clients. Disclosures include:
 - » Scope 1, 2 and 3 greenhouse gas emissions, total carbon emissions, total carbon footprint and weighted average carbon intensity.
 - » As far as reasonably practicable, climate value-at-risk and metrics that show climate warming scenario such as implied temperature rise.

When does it come into force?

There is a phased approach to implementation:

- Largest asset managers with more than GBP 50 billion of AUM and asset owners with assets over £25 billion with a deadline to publish first report by 30 June 2023
- All remaining in-scope smaller firms with assets more than GBP 5 billion with a deadline to publish first report by 30 June 2024

How can MSCI help?

- **Climate Change Metrics** - [Carbon footprinting](#) for Scopes 1, 2 and 3 (absolute and intensity-based metrics) for all PCAF² asset classes.
- **Climate Scenario Analysis** - forward-looking issuer and portfolio valuation assessment on transition and physical risks across different scenarios and time horizons. MSCI’s [Climate Value-at-Risk](#) model includes Orderly Transition, Disorderly Transition, and Hot House World scenarios and is available across listed equities, corporate bonds, sovereign bonds and real assets.
- **Temperature Alignment** – MSCI’s [Implied Temperature Rise](#) model is designed to show the temperature alignment of companies, portfolios and funds to global temperature targets and follows GFANZ³ global standards.
- **Climate Risk Report**: Reporting with metrics designed to be aligned with TCFD recommendations. Allows capabilities to aggregate various climate related metrics at portfolio and entity level. Provides Transparency and granularity and can be generated in a scalable way using batch reporting.

Please note that the issuers mentioned in MSCI ESG Research materials sometimes have commercial relationships with MSCI ESG Research and/or MSCI Inc. (collectively, "MSCI") and that these relationships create potential conflicts of interest. In some cases, the issuers or their affiliates purchase research or other products or services from one or more MSCI affiliates. In other cases, MSCI ESG Research rates financial products such as mutual funds or ETFs that are managed by MSCI's clients or their affiliates, or are based on MSCI Inc. Indexes. In addition, constituents in MSCI Inc. equity indexes include companies that subscribe to MSCI products or services. In some cases, MSCI clients pay fees based in whole or part on the assets they manage. MSCI ESG Research has taken a number of steps to mitigate potential conflicts of interest and safeguard the integrity and independence of its research and ratings. More information about these conflict mitigation measures is available in our Form ADV, available at <https://adviserinfo.sec.gov/firm/summary/169222>.
